EASY CHAIR NO. 110

by:carstenbuhl.com

Wood - another low carbon footprint solution
With the International Panel on Climate Change (IPCC) warning that at least 60 per cent reductions in greenhouse gas emissions will be needed to stabilize emissions at double pre-industrial levels, organizations across a range of industry sectors are now considering where such deep cuts can be achieved at a profit.

Mission
It is Carsten Buhl's mission to contribute to increase the quality of furniture and to preserve our global resources. His commitment to the environment shows in the selection of materials as well as in the manufacturing processes.*1

He believe that the products he designs should be treasured and long lived, so he chose to work with materials both natural and processed, that are gentle to the environment. Sustainability is the keyword.

*1. For instance in measuring the "Process energy requirements (PER)" Material Embodied energy (MJ/Kg), Aluminium 170.0, Plastics 90.0, Steel 34.0, Laminated veneer 11 and Air dried wood 0.5. it is natural to reject most Aluminium, Plastics and perhaps Steel.

Sustainability equals high demands to control and the supply chain.
The woods and veneers he use in the production shall be from companies who practice sustainable forestry and reforestation by only using PEFC/FSC certified raw materials.

The suppliers of paint and lacquer shall be certified for quality and environmental systems under ISO9001:2000 and ISO 14001

The suppliers of steel tubes fulfills the quality management standard ISO 9001 and the environmental management standard ISO 14001.

The suppliers of platen and chrome surfaces shall work under the EMAS regulation, furthermore they shall comply with the ISO 9001 and the ISO 14001 standards.

The transport and logistics partners shall use ECO friendly trucks to keep CO2 emission as low as possible.

Easy Chair No. 110
The Chair No. 110 is designed to meet these needs.
The chair is a game changer in its timeless contemporary and flexible design. The upholstered back and seat gives a cradle like feeling, where you just want to tuck in on a rainy day. The supporting frame is made by wood. E.g. Oak.
